Modern Control Design: with MATLAB and Simulink. Written for students and practicing engineers, this book presents the theory and applications of classical and state-space control system design. Topics covered include linear optimal control, Kalman filters, digital control systems, and state-equations. Modern Control Design - with MATLAB and SIMULINK offers a straightforward treatment of control system theory and applications. It is a unique amalgam of classical and state-space design techniques, with MATLAB/SIMULINK examples interwoven with the text.
